Underground Reuse System Line Break on Taft Street at 62nd Avenue

Hollywood, FL – City of Hollywood Public Utilities crews are working to repair a broken 36” underground line on Taft Street in the area of 62nd Avenue. This utility line carries treated effluent from the Davie/Cooper City area to the Southern Regional Wastewater Treatment Plant in Hollywood to become reuse water for irrigation. Due to the break, the two westbound lanes of Taft Street are closed to through traffic. The center turn lane is now being used for westbound traffic between 441 and 64th Avenue. **Motorists are advised to use alternate routes to avoid delays caused by this repair work.**

Crews have isolated the damaged section of pipe and are working to make the needed repairs.

For media inquiries, please contact Raelin Storey, Director of Communications, Marketing and Economic Development, at 954.921.3098.
